

DPC NETWORK

Direct Primary Care

We are the **FUTURE** of healthcare benefits

PHYSICIAN OWNED NETWORK

The LifeExec DPC Network is unique in that it is owned and created by physicians themselves. These doctors have come together to prioritize high-level care for their patients, developing this concept to enhance the current medical practice and improve the patient experience.

YOU HAVE 18,000 PERSONAL PHYSICIANS

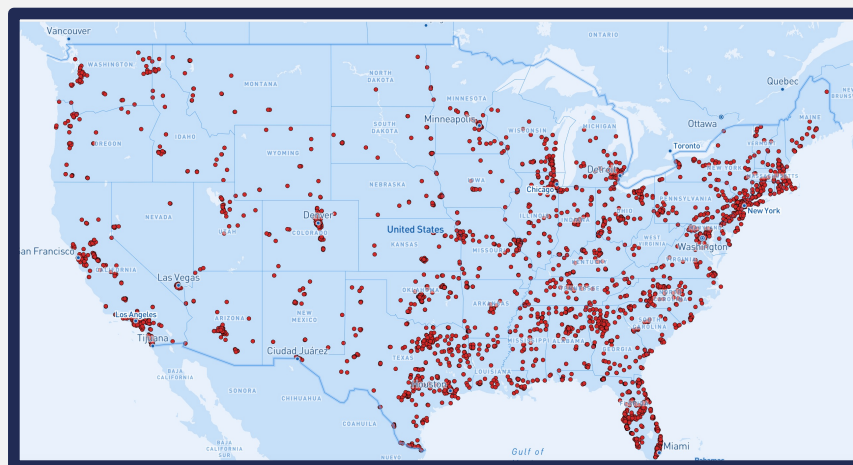

LifeExec Premier offers its members access to an extensive network of 18,000 primary care doctors across the United States. These physicians collaborate to provide the best possible care to LifeExec Premier members. With LifeExec Premier, members' medical files are stored securely in a central system, allowing all doctors within the network to have access to their complete medical history. This shared health records system ensures that doctors have the necessary information to make informed decisions about their patients' care, no matter which physician they see within the network.

NO EXTENSIVE WAIT

One of the advantages of being a LifeExec Premier member is the guarantee of no wait times when it comes to seeing a doctor. Members can expect to be seen by a physician within 24-48 hours, ensuring timely access to quality care.

CONVENIENT SCHEDULING

Scheduling an appointment is made easy for LifeExec Premier members. They can simply call the central concierge, who has access to each physician's appointment calendar. The concierge can then schedule the earliest appointment available, taking care of all the administrative work on behalf of the member.

WHY IS THERE NO LIST OF PHYSICIANS

One of the main challenges faced by physicians is the high number of calls they receive on a daily basis from patients inquiring about availability. This can be time-consuming and disrupt their practice. With the LifeExec DPC Network, a central call center is established to handle these inquiries. Prospective patients can contact the call center to inquire about availability without directly interrupting the physician's practice. The call center staff has access to each physician's appointment calendar and can provide accurate availability options to callers, streamlining the scheduling process and reducing interruptions for physicians.

SELECTING A PRIMARY CARE PHYSICIAN

In the LifeExec DPC Network, you can choose a preferred doctor. Once you sign up, the concierge will present you with available options. After your visit, you have the option to request that physician to be your primary care doctor
